

Canam Pipe & Supply Kazakhstan Road Show November 2007

Canam Pipe & Supply and our partners, Apache Pipeline Products, Bruin Instruments, GRM Valve Products, Paintearth Energy Services and Western Silverline recently held their Manufacture Road Show in Kazakhstan between Nov. 6th – 12th.

The purpose of this Road Show was to introduce the manufactures product lines to Canam's clients in various locations throughout Kazakhstan.

The event was held in the cities of Kyzylorda, Aktau, Aktobe and Almaty, and was well attended by Canam's clients in each location. Each event started off with a presentation by each of the participating manufactures, followed by one on one question and answer sessions between the manufactures and the clients.

A lot of interest was shown by the attendees to all of the products that were on display from all of our manufactures. Each manufacture provided brochures and electronic information on their product lines that was handed out to the guests. Door prizes were also given away throughout the night.

Just as important as the product information that was available to everyone was the exchange of ideas and information and the interaction that took place between all of the participants. Although people live in the same cities they do not often have an opportunity to talk to their friends in the same industry and this event brought old friends together and new friendships were also formed.

Canam Pipe & Supply, Apache Pipeline Products, Bruin Instruments, GRM Valve Products, Paintearth Energy Services and Western Silverline would like to thank our friends who attended the Road Show for joining us and we look forward to seeing you all again soon. We hope to make the Road Show an annual event and look forward to presenting many of the other manufactures that we also represent at future Road shows.

Canam Pipe & Supply, and our manufactures, would like to thank the event managers, translators, hotel & restaurant staff, at each location for their hard work and assistance in making the Road Show a success.

Apache Pipeline Products is a major manufacturer of pipeline cleaning and maintenance equipment. We produce and supply a complete line of pigs and pigging equipment for oil, natural gas, and industrial pipelines worldwide.

Bruin Instruments Corp. is a major manufacturer of chemical injection pumps and accessories. Bruin specializes in the design, manufacture, sales, and services of Bruin Pumps™ and chemical injectors for the global oil and gas market.
